Graphic Organizers by Carolyn  
NonCom

Bubble options:

Export to use in a presentation, publication.... As a .jpg or .png image.

[.jpg properly referred to as JPEG, short for Joint Photographics Experts Group and is a method of file compression called lossy. Some detail is lost but can reduce up to 5% of the normal size.

.png is short for Portable Network Graphics and was created as a more powerful alternative to compress images, but does not support animation.]

## GLIFFY

<http://www.gliffy.com/>

double-click to 'create a document' when prompted. Then drag and drop in shapes from the left panel.

Create links with the link tool at the top. Be sure to link them to the object's small red link connector. Your basic editing tools are from left to right:

Text Tool, Draw Oval, Draw Square, Link Tool, Line Tool, Selection, Move in Front/Back, Hand Tool, Zoom Tools

On the Right-panel is the document properties panel. Here you can edit your objects. You can select your object and you can change the colors with the fill bucket (on the left) or line bucket (on the right) to change the colors.

You can export your diagram as: SVG (Vision), Gliffy XML, JPEG, or PNG. You can print, but to save you need to create a free 30-day free trial account. [Gliffy tutorial for storyboarding by a teacher from TeacherTube](#)

You will be asked at different points to purchase an account. You can save and work with up to 5 diagrams and then you will be asked to purchase a premium account. You can keep erasing and re-using your diagrams however.
